

## Yuppie Warfare 5.12a

Hornets Nest in South Seas at Mt. Rushmore

7/3/12 by Jason McNabb and Adam Bergdale

Yuppie Warfare is a great route that had anchors in need of an upgrade. The previous anchors were a mix of non stainless Rawl and Wedge bolts connected directly with non-stainless 5/16 chain (Rusting) and no hangers. The rope was meant to be threaded through tied webbing and a carabiner with its gate epoxied shut. With no hangers and the diameter of the chain making it difficult to clip carabiners or other hardware into them, climbers needed to use the old webbing and carabiner if they were going to toprope the route after leading it. We replaced the anchor setup with BHCC stainless hardware.

### **Previous Hardware:**

3/8 non stainless wedge bolt (no hanger)

3/8 non stainless Rawl 5 piece bolt (no hanger)

5/16 non stainless chain (8 links)

Tied nylon webbing

Glued carabiner

### **BHCC Hardware Installed:**

Fixe Triplex Bolt (x2)

Petzl Coeur Hanger

Fixe Top Hanger

8mm stainless quicklink (x3)

8mm stainless chain (x5....4 on anchor 1 for cutting)
